

WCC Mobile

for ios, android [and possibly Windows Phone]

The Problem

As we all know, a large part of success in college depends on the accessibility of college services and information. There is a larger trend going on today, where students are increasingly depending on mobile phones as their only tie to the internet as a whole.

The college website is a great tool, but lacks much of the functionality expected from a mobile user in today's portable world.

To solve this, a team of students jointly coordinated under Prof. Christine Thomas and Prof. Dennis Ramos is currently developing **WCC Mobile**.

The App

Like the official university apps provided by Yale, Stanford or Texas A&M, **WCC Mobile** will feature a variety of smaller sub-applications to address students' needs, such as:

Directory

A quick, searchable index of useful WCC contacts for students, including professors, faculty, and department front-desks. Find the contact you want to talk to, and place a call or email directly to them straight from the WCC Mobile app.

Transit

Instantly provides copies of relevant bus, train, and shuttle schedules relevant to the student's needs. Travel by bus? Just hit Bus, and the app will find you the westchestergov.com schedule for every Bee-Line route that goes through WCC, whether it's the 1C, 15, or 41!

Dining Services

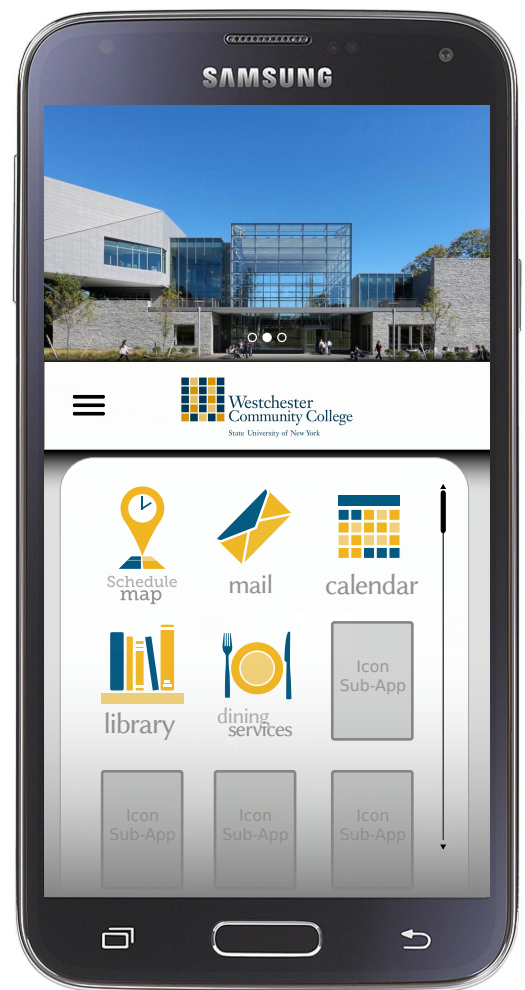

Find hours of operation, Viking Café menus, and catering information right through WCC Mobile!

Map

Like using GPS? Find your way around campus using WCC Mobile's interactive map. Pinpoint your own location by looking for the blue dot, and select any building on campus to have a path plotted for you. Or, use your WCC class schedule and have the map tell you where your next class is, how to get there, and how much time you have until it starts!

..And many more!

Including a calendar of campus events, access to your Blackboard and my.sunywcc.edu email, along with sub-apps for Student Involvement, Counseling, Athletics, Career Services and others,

For more information, contact:

Prof. Christine Thomas | christine.thomas@sunywcc.edu
Prof. Dennis Ramos | dennis.ramos@sunywcc.edu

Look forward to more updates as progress develops!
